deColoured Top Project

1

Bunch and tie-off parts of your fabric with string or rubber-bands.

2

Apply deColourant[®] or some of the many color choices of deColourant[®] Plus. The area that is tied-off will resist the deColourant treatment process.

3

After you have covered the area with deColourant[®] allow it to dry.

4

When the item is dry enough, you may then activate the deColouring process with heat from your iron.

5

To finish just wash out any excess deColourant[®] with water and mild soap.

6

After washing the hand of the fabric will be the same as the original. But now your pattern and colors will be different !

Please read all instructions before beginning. Read and follow all manufacturers instructions for all tools and materials used. Provide adult supervision if children participate in this and all craft projects. The information on this instruction sheet is presented in good faith, but no warranty is given, nor results guaranteed. Because we have no control over the use of materials and tools, nor surroundings, during construction of projects, we disclaim any liability for injury, damage, or other untoward results.
